UCSF Children's Communication Center Video Outreach ListenUp! Program for information on how we can make a personalized video for your child on his/her unique hearing loss. www.ohns.ucsf.edu/listenup

Please Consider Indicated Items in the Child's Educational Program:

Teacher inservice and seating close to teacher	Hearing monitoring at school everymos.	Amplification monitoring
Contact your school district's audiologist	Protect ears from noise to prevent more loss	Educational support services/evaluation
Screening/evaluation of speech and language	Note-taking, closed captioned films, visuals	FM system trial period
Educational consultation/ program supervision by specialist(s) in hearing lossRegular contact with other children who are deaf or hard of hearing		
Periodic educational monitoring such as October and April teacher/student completion of SIFTER, LIFE		

NOTE: All children require full access to teacher instruction and educationally relevant peer communication to receive an appropriate education.

Distance, noise in classroom and fragmentation caused by hearing loss prevent full access to spoken instruction. Appropriate acoustics, use of visuals, FM amplification, sign language, notetakers, communication partners, etc. increase access to instruction. Needs periodic hearing evaluation, rigorous amplification checks, and regular monitoring of access to instruction and classroom function (monitoring tools at www.SIFTERanderson.com).
