22nd ANNUAL Advances in Diagnosis and Treatment of Sleep Apnea and Snoring

This course has been coordinated through the University of California, San Francisco Department of Otolaryngology-Head and Neck Surgery and the Penn Center for Sleep Disorders at the University of Pennsylvania. The program is designed to provide a comprehensive review and update on recent advances in sleep apnea and snoring. New approaches and controversies in the management of patients with sleep disordered breathing will be highlighted. Leaders in the field from Sleep Medicine, Otolaryngology-Head and Neck Surgery, Pulmonary and Critical Care Medicine, Oral and Maxillofacial Surgery, Dentistry, Pediatrics, Bariatric Surgery, Neurology and Obesity Research will share their medical and surgical expertise in didactic sessions, case presentations and workshops. There will be ample opportunity for interaction with participating faculty. An electronic course syllabus, complete with program outline and up-to-date references, will be provided to each participant. Please bring your laptop or tablet if you would like to view the syllabus during the didactic sessions.

TARGET AUDIENCE

This continuing medical education activity is intended for the physician in Sleep Medicine, Otolaryngology-Head and Neck Surgery, Pulmonary Medicine, Oral and Maxillofacial Surgery, Family Practice, Internal Medicine, Pediatrics, Cardiology, Neurology, Psychiatry, and Geriatrics. Dentists, sleep respiratory therapy technologists and nurses are also invited to attend this program.

OBJECTIVES

Upon completion of this course, participants will be able to:

- Apply new developments in the pathogenesis, diagnosis, and management of patients with sleep disorders and sleep disordered breathing;
- Assess new, alternative, and established medical and surgical treatments for sleep apnea and snoring in adults and children;
- Evaluate the advantages and disadvantages of home vs. in-laboratory sleep testing;
- Assess the medical and social consequences of sleep apnea and snoring;
- Evaluate how upper airway imaging demonstrates the impact of treatments and may improve treatment selection for sleep apnea and snoring;
- Provide new information to patients regarding the association between obesity and obstructive sleep apnea and the outcomes of medical and surgical treatment of obesity.
